Re: Intermountain Power Generating Station Unit No. 2
RJM Proposal No. 910614

Dear Mr. Krikorian:

RJM Corporation's delivery schedule for forty-eight (48) flame stabilizers designed for Unit No. 2 is ten (10) weeks. Should you issue a purchase order within the next week, the delivery schedule should comfortably meet your October outage period. Activities required to complete the MZ flame stabilizer design are listed below. All fees are quoted on a fixed price basis and are inclusive of all travel and per diem costs. State excise and sales taxes are not included and, if applicable, will be an additional charge to your account. Time for conferences and meetings are not included in the cost and should such be required, they will be charged to you on a time and materials basis in accordance with our Fees, Terms and Conditions schedule which is attached.

- | | | |
|----|--|-----------------------|
| 1. | Burner Airflow Model | \$9,000 |
| 2. | MZ Flame Stabilizers | |
| | a. Engineering and Design (one time charge) | \$7,200 |
| | b. Forty-eight (48) stabilizers @ \$2100 each) | \$101,800 ? \$100,800 |

Please note that the charge for the burner airflow model and engineering and design of the MZ flame stabilizers represents a one time charge for both units provided that the burners do not dimensionally change significantly as part of the burner design improvement program. Also, the above cost of the stabilizer reflects a July 1, 1991 price change. However, since LADWP plans to proceed with the engineering portion of the program outlined in our Proposal No. 910614 the lower price for the flame stabilizers quoted as part of that program will be honored.
